PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of professional experience and a strong front-end foundation in React.js, Next.js, and TypeScript, complemented by hands-on back-end development with Node.js, Express.js, REST APIs, and relational/NoSQL databases (MySQL, PostgreSQL, MongoDB). Experienced in delivering end-to-end products — from UX/UI design in Figma, through pixel-perfect React implementation, to API integration and cloud deployment (Vercel, Railway, AWS). Comfortable with Docker, JWT authentication, and Git-based workflows. Proven track record with Brazilian and international clients (USA), including a SaaS application designed and implemented end-to-end. Fluent in Portuguese; conversational English (B1). Open to remote opportunities worldwide.

TECHNICAL SKILLS

Front-End: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design, Mobile-First Design, Component-Based Architecture, State Management, React Hooks

Back-End: Node.js, Express.js, PHP, REST API Design & Development, JWT Authentication, OAuth basics, Async/Await, Middleware Patterns

Databases: MySQL, PostgreSQL, MongoDB, SQL fundamentals, Schema Design basics

DevOps & Infrastructure: Docker, Git, GitHub, Vercel, Railway, AWS (basics), CI/CD basics, Environment Variables, Deployment Pipelines

Testing: Automated Testing fundamentals, Unit Testing concepts

UX/UI Design: Figma, Prototyping, Wireframing, User Interface Design, Design Systems, Pixel-Perfect Implementation

APIs & Integration: REST API Construction, REST API Consumption, JSON, HTTP, Fetch, Axios

Methodologies: Agile/Scrum, Sprint Planning, Code Reviews, AI-Assisted Development, User-Centered Design

Soft Skills: Self-Management, Remote Work, Cross-Functional Collaboration, Stakeholder Communication, End-to-End Ownership

PROFESSIONAL EXPERIENCE

Permit Beacon (USA) | Full Stack-Capable Front-End Developer & UX Designer | 2025

US-based SaaS client | Remote

- Owned the entire product delivery — designed the UI/UX prototype in Figma from scratch, then implemented the full front-end in React.js and TypeScript with pixel-perfect fidelity.
- Integrated the application with REST APIs, handling data fetching, error states, and authentication flows.
- Built a scalable design system with reusable React components, supporting consistent UX and faster future iterations.
- Worked remotely with a US-based client, communicating in English and delivering on time and within scope.

T2 Educação | Senior UX Designer & Front-End Contributor | 2025

EdTech company | Remote

- Designed and shipped institutional website pages, sales pages, and paid traffic landing pages (Google Ads / Meta Ads) with strong focus on conversion and front-end performance.
- Built reusable UI components and design tokens in Figma, ensuring visual consistency and faster handoff to development.
- Owned the full UX/UI pipeline — from wireframes to high-fidelity prototypes ready for implementation.
- Collaborated with the marketing team to align design, copy, and front-end behavior with business KPIs.

Angry Rabbits Studios (USA) | UX Designer | 2024

US-based digital agency | Remote

- Designed UX/UI deliverables in Figma for multiple clients across different industries, working from creative briefs and stakeholder requirements.
- Translated business goals into wireframes, user flows, and high-fidelity mockups, iterating based on agency and client feedback.
- Operated fully remotely with a US-based team, managing parallel projects and meeting agency deadlines.

Tamborete Pay | Mid-Level Front-End Developer | 2022 — 2023

Fintech (payments platform) | Remote

- Developed and maintained the front-end of a fintech payments platform using React.js and TypeScript, building new screens and improving existing flows.
- Integrated front-end components with internal REST APIs to handle financial transactions, account data, and user dashboards.
- Proposed and implemented UI/UX improvements that reduced friction in critical user flows, in collaboration with product and design teams.
- Participated in Agile ceremonies — sprint planning, code reviews, and retrospectives.

Mei em Foco | Mid-Level Front-End Developer | 2021 — 2022

Digital platform for micro-entrepreneurs | Remote

- Developed and implemented the platform's front-end, including institutional website pages and paid traffic campaign landing pages.
- Built responsive layouts with React.js and CSS3, focusing on page performance, mobile experience, and conversion.
- Created reusable UI components, contributing to a more consistent visual language across the platform.

PERSONAL & STUDY PROJECTS (BACK-END / FULL STACK)

- **REST APIs with Node.js & Express:** Built full-stack projects featuring CRUD operations, JWT authentication, route protection, and middleware patterns following REST conventions.
- **Database integration:** Designed schemas and integrated APIs with MySQL, PostgreSQL, and MongoDB, applying basic data modeling principles.
- **Containerization with Docker:** Created reproducible development environments using Docker and Docker Compose for full-stack applications.
- **Cloud deployment:** Deployed full-stack applications to Vercel, Railway, and AWS — managing environment variables, build pipelines, and production configuration.

- **Authentication & security:** Implemented JWT-based authentication and explored OAuth flows in personal projects.
- **Testing:** Practiced automated and unit testing fundamentals to ensure reliability of API endpoints and application logic.

KEY ACHIEVEMENTS

- **Permit Beacon (SaaS, USA):** End-to-end ownership of a complete SaaS product — UI/UX design, front-end implementation, and API integration for an international client.
- **Tamborete Pay (Fintech):** Maintained and evolved the front-end of a payments platform with sensitive financial flows in production, in a TypeScript + React codebase.
- **Upwork Top Rated (Top 10%):** Recognized for consistent client satisfaction, on-time delivery, and quality across international projects.
- **4+ years of remote work:** Proven track record of self-managed delivery for Brazilian and international (USA) clients.

EDUCATION

Bachelor's Degree in Software Analysis and Development

UNOPAR — Brazil | Graduated 2020

COURSES & CERTIFICATIONS

- React from Beginner to Mastery — Udemy
- TypeScript from Basic to Advanced — Udemy
- JavaScript from Basic to Advanced — Udemy
- Figma from Beginner to Professional — Udemy
- PHP Developer — CELKE

ADDITIONAL INFORMATION

Nationality: Brazilian

Languages: Portuguese (Native), English (B1 — Conversational)

Work Preference: Remote — available for national and international projects
